Comparison section

Prompt for Replit: Replace “Daily Score” with “Comparison” Section (Advanced Performance Analytics)

We need to rename the existing **Daily Score** section to:

📊 Comparison

This section must become a performance analytics dashboard that helps users compare their productivity across:

- Daily
- Weekly
- Monthly
- Historical trends

It must be visual, simple, and easy to understand.

1️⃣ Rename Requirement

- Replace “Daily Score” tab name with **Comparison**.
- Daily score calculation logic remains unchanged.
- Only UI and analytics features expand.

2️⃣ Daily Comparison View

Inside Comparison:

Show:

- Today’s Score %

- Yesterday's Score %
- Difference Indicator:
  - ↑ +5%
  - ↓ -3%
- Visual progress bar

This updates daily after lock time.

3️⃣ Weekly Analytics Section

3.1 Weekly Average Display

Show:

- This Week Average %
- Last Week Average %
- Difference (increase or decrease)

Example:

This Week: 72%

Last Week: 65%

Change: +7%

3.2 Weekly Historical Breakdown (Very Important)

Display weekly averages starting from first recorded week:

Example:

Week 1 → 55%

Week 2 → 61%

Week 3 → 70%

Week 4 → 68%

Week 5 → 74%

This should:

- Be scrollable.
- Show chronological growth.
- Allow user to see improvement pattern.

3.3 Weekly Comparison Tool

Add option:

“Compare This Week vs Previous Week”

System calculates:

This Week Average - Previous Week Average

Show:

- Percentage difference
- Up/down arrow
- Color-coded indicator (green/red)

4️⃣ Monthly Analytics Section

4.1 Monthly Average Display

Show:

- Current Month Average %
- Last Month Average %
- Percentage difference

Example:

January → 66%

February → 74%

Change → +8%

4.2 Monthly Historical Overview

Display:

Month 1 → %

Month 2 → %

Month 3 → %

Month 4 → %

Allow scrolling if many months.

4.3 Monthly Comparison Option

Add:

“Compare Current Month vs Last Month”

Automatically calculate difference.

5️⃣ Overall Growth Section (From Start)

Add:

“Lifetime Average Score”

Calculate:

Total of all daily scores ÷ total number of recorded days.

Also show:

- Best Week Ever
- Best Month Ever
- Highest Daily Score
- Lowest Daily Score

6️⃣ Visualization Requirements

Make the section highly visual:

Include:

- Line Graph (weekly progression)
- Bar Chart (monthly comparison)
- Progress rings (current week/month)
- Green/Red growth indicators

Graphs must:

- Load fast
- Be smooth
- Not lag on large data

7️⃣ Data Calculation Rules

Weekly Average:

Sum of daily scores in week ÷ number of recorded days in that week.

Monthly Average:

Sum of daily scores in month ÷ number of recorded days in month.

Lifetime Average:

Sum of all daily scores ÷ total recorded days.

8️⃣ Database Requirements

Store:

- daily_score (already exists)
- weekly_average (can be calculated dynamically or cached)
- monthly_average (optional cache)

- lifetime_average
- best_week_score
- best_month_score

9️⃣ Performance Requirements

- Weekly & Monthly averages should auto-update after daily lock.
- Avoid recalculating entire history every time.
- Cache results after calculation.
- Optimize queries with indexing.

🔟 UI Layout Suggestion

Comparison Page Layout:

1. Today vs Yesterday
2. This Week vs Last Week
3. Weekly History List
4. This Month vs Last Month
5. Monthly History List
6. Lifetime Statistics
7. Graph Section
