Settings option

Prompt for Replit: Build Full Settings System for Productivity App

We need to design a comprehensive **Settings Section** for a productivity-based gamified app with levels and groups.

The settings should be modular, scalable, and future-proof.

Below are the required and suggested settings.

1️⃣ Appearance Settings

1.1 Theme Mode

- Light Mode
- Dark Mode
- System Default (Optional enhancement)

When user changes mode:

- Entire app UI updates instantly.
- Persist preference in database.

2️⃣ Productivity Tracking Settings

2.1 Hourly Task System Toggle (Very Important)

Problem:

Many users cannot consistently log hourly tasks.

Solution:

Add a toggle:

- ✅ Enable Hourly Task Tracking
- ❌ Disable Hourly Task Tracking

Behavior Logic:

If ENABLED:

- Hourly Task Completion % is included in level qualification.
- User must meet required hourly % for their level.

If DISABLED:

- Hourly task metric is completely excluded from level qualification.
- Level calculation will only depend on:
  - Daily Average Tasks %
  - Good Habits %
  - Bad Habits %

System must dynamically adjust qualification logic based on this toggle.

This setting directly impacts progression logic.

The above Feature of Hourly task it need to include or not include option for the grou changing only . Becuase many people cant able to write down the hourly task they need to have a feature where they can trun of tracking or hourly to increse or decrese their catorty for the group . only for increseing or decresing in the levels to include the daiy avg of hourly task .

2.2 Daily Rating Lock Reminder

Options:

- Enable End-of-Day Reminder
- Disable Reminder

If enabled:

- Send notification 1 hour before day ends if user hasn't rated.

2.3 Auto Lock Time

Allow user to select:

- 10 PM
- 11 PM
- 12 AM (default)
- Custom time (optional advanced feature)

After selected time:

- Daily rating locks permanently.

3️⃣ Group Settings

3.1 Group Notifications

User can toggle:

- All Messages
- Admin Announcements Only
- Mentions Only (Platinum+)
- Off

3.2 Group Privacy Preference

- Show My Level Publicly (On/Off)
- Show My Monthly Score (On/Off)
- Show My Streak (On/Off)

3.3 Group Interaction Settings (Platinum+ Only)

- Allow Direct Messages (On/Off)
- Allow Replies to My Messages (On/Off)

- Show Online Status (On/Off)

4️⃣ Level & Progress Settings

4.1 Performance Display Mode

- Show Percentages
- Show Score Points
- Show Minimal Mode (Just Level Badge)

4.2 Level Downgrade Protection Warning

- Enable Warning Before Downgrade
- Disable Warning

If enabled:

- Notify user 3 days before month-end if they are at risk of downgrade.

4.3 Reset Confirmation

- Confirm Before Monthly Reset (On/Off)

5️⃣ Habit Settings

5.1 Good Habit Strict Mode

If enabled:

- Missed good habit counts double negative impact.

If disabled:

- Normal calculation.

5.2 Bad Habit Strict Zero Mode

If enabled:

- Any bad habit automatically invalidates that day.

  If disabled:

- Standard percentage rule applies.

6️⃣ Notification Settings

- Daily Reminder
- Hourly Reminder
- Weekly Performance Summary
- Monthly Level Result Notification
- Group Achievement Alerts
- Streak Break Alert

All individually toggleable.

7️⃣ Data & Privacy Settings

- Export My Data (CSV)
- Delete Account
- Reset All Productivity Data
- Download Monthly Report (PDF)
- Clear Chat History (Platinum+)

8️⃣ Gamification Settings

8.1 Motivation Mode

User can choose:

- Competitive Mode (Show Leaderboards)
- Private Mode (Hide Leaderboards)

8.2 Streak Visibility

- Show Streak Publicly
- Keep Streak Private

9️⃣ Advanced Logic Settings (Optional)

9.1 Strict Level Evaluation Mode

If enabled:

- Must exceed required % (not equal).

If disabled:

- Equal to % qualifies.

9.2 Minimum Days Customization (Future Scalability)

Allow admin override for:

- Minimum 25-day requirement.
- 26-day requirement.

(Not user-controlled — admin only.)

1️⃣0️⃣ Admin-Only Settings (Owner Panel)

- Broadcast Message to All Groups
- Force Recalculate Levels
- Manually Upgrade/Downgrade User

- Lock/Unlock Group Chat
- Feature Flag Control
- Beta Feature Toggle

Technical Requirements

- Settings must be stored per user.
- Toggle-based logic must dynamically affect level calculation engine.
- All settings changes must reflect instantly.
- Secure permission-based access (especially for chat).

Important Architecture Note

Level qualification logic must:

IF hourly_tracking = TRUE:

Include hourly_percentage in calculation.

ELSE:

Exclude hourly_percentage from level qualification.

This must dynamically adjust evaluation engine.
