Group creation phase -1

Feature Specification: Group System with Productivity Levels (Updated Version)

---

1. Objective of the Group Feature

1.1 Community & Feedback System

- Create a group section inside the app.
- Share freebies, rewards, and exclusive content.
- Encourage app reviews and structured feedback.
- Promote Instagram, YouTube, and other platforms.
- Increase engagement and retention.

1.2 Gamified Retention Engine

- Introduce level-based progression.
- Encourage long-term consistency.
- Require monthly qualification to maintain levels.
- Automatically downgrade users if standards are not met.

---

2. Daily Rating System (Core Rule)

2.1 Daily Input Options

Users can log:

A. Task Rating:

- 1–10 scale

OR

B. Percentage Completion:

- 0%
- 25%
- 50%
- 75%
- 100%

2.2 Lock Rule (Critical)

- Ratings can only be submitted on the same day.
- No backdated entries allowed.
- Once the day ends → data locks permanently.
- Prevents manipulation of streaks.

---

3. Metrics Used for Level Qualification

Each day must calculate:

1. **Daily Average Task Completion %**
2. **Good Habits Completion %**
3. **Hourly Task Completion % (NEW)**
4. **Bad Habits %**

---

4. Hourly Task Calculation Logic (New Addition)

Each day:

- Users complete tasks hourly.
- Each hour has assigned tasks.
- Hourly Completion % =

  (Completed Hourly Tasks ÷ Total Hourly Tasks) × 100

Daily Hourly Average % =

Average of all hourly completion percentages for that day.

Example:

If hourly completions are:

- 80%
- 60%
- 100%
- 70%

Daily Hourly Average =

(80 + 60 + 100 + 70) ÷ 4 = 77.5%

---

5. Level Qualification Criteria

⚠️ Important Rule:

For each level, the required percentage must be met in:

- Daily Average Task Completion
- Good Habits Completion
- Hourly Task Completion
- Bad Habits = 0%

The percentage required changes per level.

---

6. Level Structure

6.1 Unproductive (Default)

- No requirement.
- All new users start here.

6.2 Bronze Level

Requirements (25 Days in 1 Month):

Each of those 25 days must have:

- ≥ 60% Daily Average Task Completion
- ≥ 60% Good Habits Completion
- ≥ 60% Hourly Task Completion (NEW)
- 0% Bad Habits

Duration Required: 1 Month

If next month standards not met → revert to Unproductive.

6.3 Silver Level

Requirements (25 Days per Month):

Each day must have:

- ≥ 70% Daily Average Task Completion
- ≥ 70% Good Habits Completion
- ≥ 70% Hourly Task Completion
- 0% Bad Habits

Duration Required: 2 Consecutive Months

If streak breaks → reset to appropriate lower level.

6.4 Gold Level

Requirements (25 Days per Month):

Each day must have:

- ≥ 80% Daily Average Task Completion
- ≥ 80% Good Habits Completion
- ≥ 80% Hourly Task Completion
- 0% Bad Habits

Duration Required: 2 Consecutive Months

6.5 Platinum Level

Requirements (25 Days per Month):

Each day must have:

- ≥ 90% Daily Average Task Completion
- ≥ 90% Good Habits Completion
- ≥ 90% Hourly Task Completion
- 0% Bad Habits

Duration Required: 2 Consecutive Months

6.6 Diamond Level

Requirements (26 Days per Month):

Each day must have:

- ≥ 90% Daily Average Task Completion
- ≥ 90% Good Habits Completion
- ≥ 90% Hourly Task Completion
- 0% Bad Habits

Duration Required: 3 Consecutive Months

6.7 Elite Level

Two Qualification Paths:

Path 1:

- 26 Days per Month
- 100% Daily Task Completion
- 100% Good Habits
- 100% Hourly Task Completion
- 0% Bad Habits
- Duration: 3 Consecutive Months

Path 2:

- 100% of total month days completed
- ≥ 95% Daily Average
- ≥ 95% Good Habits
- ≥ 95% Hourly Completion
- 0% Bad Habits
- Duration: 3 Consecutive Months

Example:

If month has 28 days →

All 28 days must qualify at ≥95%.

---

7. Downgrade Logic

Monthly Evaluation System:

- If performance drops → user moves to level matching current month performance.
- If no qualification met → return to Unproductive.
- No lifetime level protection.
- Consecutive months required for Silver and above.
- If one month fails → consecutive counter resets.

---

8. Monthly Evaluation Logic (Developer Notes)

For each user:

1. Check total qualifying days.
2. Verify daily percentage conditions.
3. Verify bad habits = 0.
4. Check consecutive month count.
5. Assign level.
6. Reset or increment consecutive counter.
7. Lock month after evaluation.

---

9. Group Integration

Inside Group Section:

- Show user level badge
- Show required % for next level
- Show remaining qualifying days needed
- Show consecutive month streak counter
- Show monthly performance summary

- Leaderboard based on:
  - Level
  - Average %
  - Consistency

---

10. Core Design Philosophy

This system ensures:

- Authentic daily accountability
- No manipulation of past data
- Strict zero bad habit enforcement
- Hour-by-hour discipline tracking
- Long-term consistency
- Strong retention mechanics
- Gamified performance ladder

Feature Specification: Level-Based Group Access System

This document defines how Groups function based on user levels.

---

1. Core Concept

Each productivity level has its own dedicated group.

Levels:

1. Unproductive
2. Bronze
3. Silver
4. Gold
5. Platinum
6. Diamond
7. Elite

Every level corresponds to a separate, exclusive group space.

---

2. Group Access Rules

2.1 Default Access

- All users start in the **Unproductive Group**.
- As users upgrade their level, they:
  - Automatically gain access to the new level group.
  - Lose access to their previous level group.
- Users cannot access lower-level groups once upgraded.
- Users cannot access higher-level groups without qualifying.

This ensures exclusivity and aspirational progression.

2.2 Downgrade Behavior

If a user is downgraded:

- They immediately lose access to the higher-level group.
- They regain access only to the group matching their new level.
- No access retention from previous higher groups.

---

3. Communication Permissions (Very Important Rule)

Chat permissions are strictly level-based.

3.1 Non-Interactive Groups

For the following levels:

- Unproductive
- Bronze
- Silver
- Gold

Users **CANNOT chat with each other.**

Group structure in these levels:

- Admin (App Owner) can post messages.
- Users can only read messages.
- No user-to-user communication allowed.
- No commenting.
- No replying.
- No direct messaging within group.

These groups function as:

- Announcement boards
- Motivation boards
- Feedback distribution channels
- Freebie/reward broadcasting spaces

3.2 Interactive Groups (Premium Tier)

From **Platinum level and above**, users gain chat access.

Applies to:

- Platinum
- Diamond
- Elite

Features unlocked at Platinum:

- Members can chat with each other.
- Members can reply to messages.
- Two-way group communication enabled.
- Community discussion allowed.

This creates:

- A reward for reaching higher productivity.
- Stronger community bonding.
- Increased retention incentive.
- Higher aspirational value for Platinum and above.

---

4. Group Privilege Summary Table

Level	Has Group	Can Read Admin Messages	Can Chat with Members
Unproductive	Yes	Yes	No
Bronze	Yes	Yes	No
Silver	Yes	Yes	No
Gold	Yes	Yes	No
Platinum	Yes	Yes	Yes
Diamond	Yes	Yes	Yes
Elite	Yes	Yes	Yes

---

5. Purpose Behind This Structure

5.1 Controlled Communication

Lower levels:

- Focus on discipline.
- Avoid distraction.
- Prevent low-productivity influence.

Higher levels:

- Reward high performers with interaction.
- Build elite accountability network.
- Create social validation.

---

6. Technical Requirements

Developer must implement:

1. Level-based group assignment logic.
2. Automatic group switching on level change.
3. Permission-based messaging system.
4. Read-only group configuration for lower levels.
5. Interactive chat system only for Platinum and above.
6. Real-time access update on upgrade/downgrade.
7. Role system:
    - Admin (Owner)
    - Member

---

7. Future Scalability

Structure should allow:

- Adding premium-only resources.

- Adding mentorship inside Platinum+.
- Adding exclusive downloads per level.
- Adding group challenges.

System should be modular and scalable.
